Website: bozheslav.com

GitHub: github.com/Magbusjap

---

## Summary

Backend Developer with hands-on production experience in Laravel and server infrastructure support. I independently deploy and maintain projects built with Laravel, PostgreSQL, Linux, and Nginx, including VPS setup, SSL, backups, hardening, and day-to-day operational tasks.

I recently migrated my projects to a Swiss server and continue developing my personal platform bozheslav.com. In parallel, I work on the open-source CMS OnFlaude and a new SEO MVP project with AI and analytics.

## Experience

### Backend Developer / Freelance

Kwork, FL.ru · Mar 2024 — Present · Remote

- Built websites and internal systems using Laravel + Filament for clients and personal projects
- Configured and maintained VPS environments: Nginx, SSL, Docker, systemd, hardening
- Migrated and maintained production projects on self-managed servers
- Integrated AI APIs: OpenAI, Claude, DeepSeek
- Developed Telegram bots and Python parsers

### Systems and Data Specialist

Vitamilk / Rostelecom · 2016 — 2022

- Worked with CRM systems: 1C, SBIS, Info-Predpriyatie
- Processed data and supported internal operational workflows
- Handled customer requests and claims-related communication
- Built a corporate website on WordPress

## Selected Projects

- bozheslav.com — production platform built with Laravel 12 + Filament 3 + PostgreSQL 16, full VPS deployment, migration to a Swiss server, Nginx, SSL, fail2ban, UFW, cron, and automated backups.
- OnFlaude CMS — open-source Laravel CMS positioned as an alternative to WordPress: Filament, PostgreSQL, media library, roles, options table, recovery endpoint.
- SEO MVP Project — new SEO-focused MVP using AI and analytics for automation and data interpretation.
- Python Automation / Bots — Telegram bots, parsers, Playwright, BeautifulSoup, and AI API integrations.

## Skills

- PHP 8.3, Laravel 12, Filament, Livewire, Eloquent ORM, REST API
- PostgreSQL, SQL, migrations, MySQL, SQLite
- Linux, Ubuntu, Nginx, SSL, fail2ban, UFW, Docker, systemd, bash, cron, VPS deployment
- Python 3, Flask, Playwright, BeautifulSoup, Telegram Bot API
- OpenAI API, Claude API, DeepSeek API, AI-assisted workflows
- HTML5, CSS3/SCSS, JavaScript, BEM, Tailwind CSS, Vite, MJML
- Git, GitHub, SSH, DBEaver, VS Code, PHPStorm

## Education and Development

- Aroken.ru — Web Development Program, 2024 — Present

- Self-education: C#, Python, WordPress, algorithms, OOP, backend, and infrastructure
- PGKT Alter — Vocational Education, Advertising, 2008 — 2012

## Languages

---

Russian — Native · English — B1 · Serbian — A1

## Goal

---

Looking for a remote Backend Developer role focused on Laravel, PostgreSQL, Linux, and production support. I am also interested in positions at the intersection of backend, infrastructure, API integrations, automation, and AI-enabled products.
